- Fire Suppression Systems
- Smoke Ventilation Systems

Fire Safety and Detection
from industry
professionals with over
40 years' experience...

Protect your staff, customers,
business and property with
Life safety systems that never
takes a break...

Life Safety

Where people are concerned, fire and life safety systems are of paramount importance. An intelligent system that alerts and directs users to a place of safety can help save time and also lives...

BDS work extensively within the core technology producing truly bespoke solutions that protect people and property...

Our Life safety systems often include:

- Emergency voice communication system (EVCS)
- Fire telephone systems
- Disabled Refuge systems
- Emergency lighting systems
- Trusted Call Systems

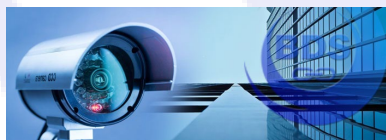

Truly Integrated Security

BDS has extensive experience in supplying, installing and maintaining commercial CCTV systems, Intruder Alarms & Access control systems. We have a proven record of understanding our customers' individual needs and providing cost effective Integrated Security system solutions.

Access control systems help control business security by controlling right of entry into buildings by controlling doors, turnstiles, gates and barriers. BDS are fully trained in the installation of high security Biometric Systems using fingerprint, palm and facial recognition.

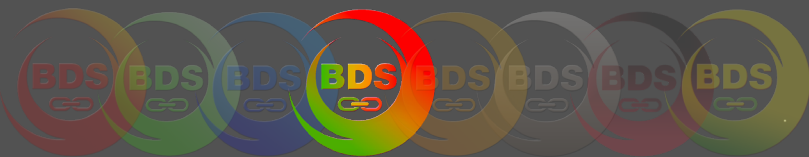

Intruder Alarms are an insurance requirement for the majority of commercial buildings and domestic homes. BDS offer a full design, installation and commissioning package of new systems as well as takeovers of existing systems offering a cost effective maintenance and monitoring package.

All systems are certificated to NACOSS Gold standards

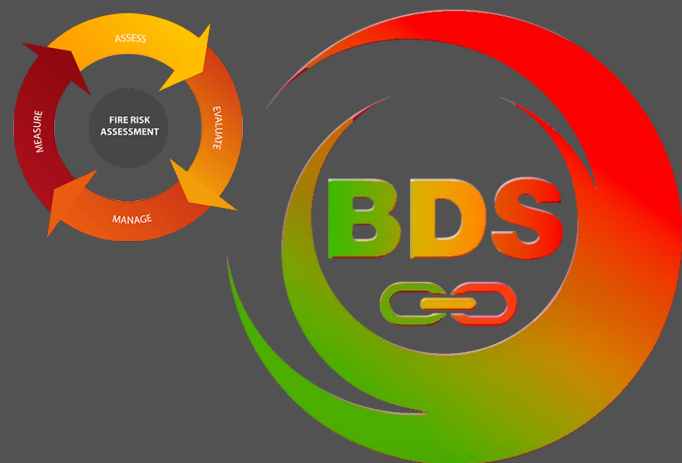

Integrated Security
Systems from BDS, with
your security in mind...

So many businesses simply
aren't aware of their
responsibilities where
Fire Safety is concerned...

Fire Risk Assessments

What is a Fire Risk Assessment?

It's a careful look at your premises and the people who use them, from a fire prevention perspective. It's about understanding the potential risks, then improving your fire safety precautions to keep people safe.

A Fire Risk Assessment is required if you are;

- responsible for business premises
- an employer or self-employed with business premises
- responsible for a part of a dwelling where that part is solely used for business purposes
- a charity or voluntary organisation
- a contractor with a degree of control over any premises
- providing accommodation for paying guests

BDS can help you make these critical decisions and assess your business... & always follow the colour coded advice!

Service & Maintenance

BDS can offer bespoke maintenance packages for Fire, Life Safety and integrated security systems, account management can be arranged to build up a trustful working relationship, periodic visits can be tuned to the clients' requirements such as permanently manned sites, monthly or weekly visits, quarterly or Bi annually. Always backed up with enhanced service response.

We have engineers on standby 24hrs a day 365 days of the year

BDS are compliant and certified to NSI Fire Gold standard and NACOSS Gold for QMS ISO9001 and BAFE SP203-1

of your Fire, Life Safety
& Security Systems

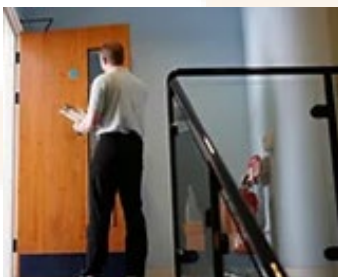

Passive Fire Protection

Putting your building compliance and safety in someone else's hands is an important decision that must be considered carefully as it's a decision critical to getting it right. Ensuring your buildings are compliant, both now and into the future, will form an important part in your overall fire strategy...

BDS provide a range of passive fire protection and fire stopping services that include:

- Fire Door & Compartmentation Surveys
- Fire Compartmentation Installation & Remediation
- Fire Door Repairs, Maintenance & Remediation
- Fire Door Installation

IFC Certification

Passive Fire Protection is
an important part
of your overall
fire strategy

BS 8629:2019.

Specifically designed to assist the fire & rescue services in evacuating high-rise residential buildings

Fire Evacuation Alert Systems

This new British Standard provides guidance on how to install a communication system that advises residents to evacuate.

Not to be confused with fire detection and alarm systems, evacuation alert systems are for use by the fire and rescue service only, which may, in the course of managing a fire incident, want residents to evacuate sections of a floor (in a large building), individual floors, or the entire building.

This standard exists to help ensure that systems are fit for purpose and to encourage uniformity. If systems look and function the same way in every building firefighters won't waste any time understanding how they work.

BDS have the expertise, technical knowledge and logistical solutions for design and installation of these key fire and life safety systems.

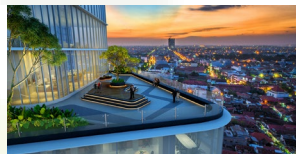

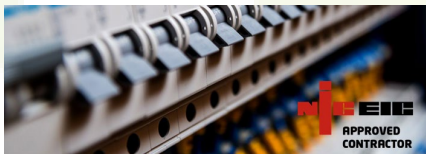

BDS EFM Limited

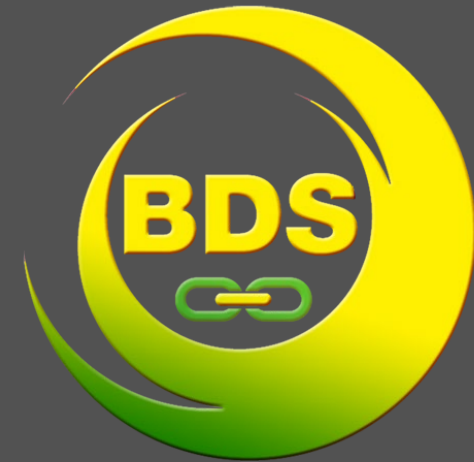

BDS Electrical FM is a provider of control and power systems. We have a recognised reputation for cost-effective solutions, delivered on time and to budget. We have a breadth of experience gained across multiple industries and are especially strong in the motor industry sector. We have the technical expertise and know-how to undertake large or small projects, therefore proving to be the perfect choice as electrical contractors.

Projects can vary from a basic equipment power supply to whole substation distribution systems. We can also design and install control panels including various control wiring systems. In conjunction with our clients, we have grown, developed, and diversified to acquire an exceptional range of experience in multiple sectors. Quality and Health & Safety is at the heart of everything we do within the industry. We are proud to be an accredited, responsible, customer focused company.
